Education

V School

Full Stack Software Development

Salt Lake City, UT

Graduated 2019

- Participated in Mentor Program
- Voted "Most Beautiful Apps"

Jambox Recording School

Audio Engineering Technician

Manhattan, NY

Graduated 2007

Projects

Crypto Minerz | *http://cryptominerz.herokuapp.com/*

- eCommerce site for selling crypto hardware using BestBuy's API.
- A collaborative project with 3 people using Git for workflows.
- I was primarily responsible for front-end development and mapping data provided by Axios calls to the back-end.

Built with: Reactstrap, MongoDB, JavaScript, Express, CSS, & Node.js

SmartGarden | *https://smart-garden-planting.herokuapp.com/*

- Full-Stack app to provide optimal garden planting recommendations based on companion planting science.
- Built custom RESTful API in Node.js and Express providing endpoints for both routing and for post/delete CRUD functionality.

Built with: React, JavaScript, MongoDB, Mongoose, Node.js, Express & CSS

Blackjack | *https://blackjack-for-cardcounters.netlify.com/#/*

- A Front End fully responsive game that teaches card counting.
- Provides in-depth game analytics to keep track of casino/player stats.
- Uses the Deck of Cards API to make Axios requests for deck, shuffle, and dealing cards. Data is maintained in state and used for gameplay.

Built with: React, JavaScript & CSS
